

Hand-drawn schematic diagram of a radio receiver circuit, labeled "PRIOR ART". The diagram shows a series of components connected in a signal path. On the left, a circular component (likely a speaker or antenna) is connected to a "CENTRE" point. This is followed by a series of components labeled "L", "R", "LS", "RS", "Top", "Sub", and "Centre". These are connected to a series of components labeled "52", "50", "50", "56", "64", "60", and "58". The final output is connected to a "SUB 66" component. The diagram is labeled "PRIOR ART" at the bottom right.
